

Christian Carrasco

IT OPERATIONS & SECURITY LEADER

christiancarrasco.dev · linkedin.com/in/cybercc · github.com/labwithchristian

IT operations and security leader with ten plus years in enterprise environments. Five years as incident manager and operations lead on assignment at Toyota Motor North America, a year as a SOC analyst and lead SIEM administrator, and five years administering systems and identity in a HIPAA-regulated healthcare environment. Supported audit and control testing across SOX, PCI DSS, HIPAA, CMS, and ISO 27001.

Experience

Beyondsoft Consulting Mar 2021 to Aug 2026

Remote · On assignment at Toyota Motor North America

Operations Manager	2022 to 2026
Senior Lead Systems Analyst	2021 to 2022

- Incident manager for high-impact production events on a global client account: set severity, coordinated the response, decided when to escalate, and briefed client executives.
- Led a five-person engineering team with a shared backlog and on-call rotation; owned hiring, one-on-ones, SLA performance, and vendor contracts.
- Ran incident and problem management and coordinated change and maintenance windows.
- Led post-incident reviews that turned recurring failures into preventive controls.
- Audited client AWS accounts for exploitable firewall and DNS misconfigurations, and remediated DDoS vectors through AWS Shield, WAF, and CDN.
- Administered Entra ID conditional access and MFA, and owned the SSL certificate lifecycle.
- Supported the annual SOC review against ISO 27001.

TelevisaUnivision Oct 2019 to Oct 2020

Remote

Information Security Analyst

- Triaged SIEM alerts across networks, endpoints, and servers, correlating events to reconstruct incident timelines.
- Investigated spear-phishing campaigns aimed at senior staff and delivered end user security awareness training.
- Lead LogRhythm administrator: built correlation rules, wrote custom parsers for malformed log sources, and mapped detection coverage to MITRE ATT&CK.
- Planned and executed the SIEM migration onto a restructured server architecture, then validated coverage so monitoring did not silently degrade.
- Supported SOX and PCI DSS audit and control testing.

SIEM Engineering · LogRhythm · MITRE ATT&CK · Detection Rules · Rapid7 · NIST 800-53 · SOX · PCI DSS

Cigna HealthCare Oct 2014 to Oct 2019

Doral, FL

System Administrator

- Level 3 escalation point for a support team of four serving roughly 350 employees in a HIPAA-regulated environment.
- Administered Active Directory and Azure AD, Exchange permissions, Group Policy, and MFA, applying least privilege at provisioning and treating revocation at termination as a controlled step.
- Built the standard PXE images and SOPs behind onboarding and offboarding, and deployed security agents through SCCM.
- Supplied access records and audit evidence through HIPAA and CMS audit cycles.

Compliance and Frameworks

REGULATORY	SOX, PCI DSS, HIPAA, CMS, ISO 27001
FRAMEWORKS	NIST 800-53, NIST CSF, MITRE ATT&CK, ITIL v4
PRACTICE	Control design and operating effectiveness testing, User access reviews, Formal risk acceptance, Findings tracked to closure in ServiceNow, Audit evidence

Tools and Platforms

CLOUD	AWS, AWS Shield and WAF, Microsoft Azure
MICROSOFT	Entra ID, Active Directory, Microsoft 365, Exchange, Group Policy
SECURITY	LogRhythm, Rapid7, Wireshark
OPERATIONS	ServiceNow, Dynatrace, PagerDuty, Jenkins
INFRASTRUCTURE	SCCM, PXE imaging, VMware, Cisco, Linux

Certifications

SECURITY	Certified Ethical Hacker (CEH), CompTIA Security+
CLOUD	AWS Certified Cloud Practitioner
NETWORK	Cisco CCNA Routing & Switching
PROCESS	ITIL v4 Foundation, CompTIA Project+
IN PROGRESS	CISSP (target November 2026)

Education and Competitions

Western Governors University

Oct 2017 to Jan 2021

Online

B.S. Network Operations and Security

- Competency-based degree covering network design, network operations, and network and cloud security, with industry certifications built into the program. Completed while working full time.

National Cyber League

2019 to 2020

Remote

Individual Game, Cyber Skyline

- Proctored, hands-on skills assessment scored on accuracy and completion across ten challenge modules.
- Fall 2019: 1,470 of 3,000 points at 72.9% accuracy. Strongest in OSINT, cryptography, wireless access exploitation, network traffic analysis, password cracking, and log analysis.
